Getting Started: Mobilize for Implementing Healthy People

The goal of this course is to help health professionals and people in agencies and organizations use the mobilize component of Healthy People 2020 and MAP-IT to implement Healthy People 2020. They will be able to be effective users and expert consultants to find and explain tools and resources available on the Healthy People 2020 and The Community Tool Box (CTB) web sites to achieve the Nation's health goals and objectives. They will have a very solid understanding of how to implement Healthy People 2020.

The course covers the **Mobilize** section of **Program Planning**.

All of the materials to study and read are at these Healthy People 2020 web site links:

www.healthypeople.gov and www.healthypeople.gov/2020/tools-and-resources/Program-Planning

These are the graphics you will see and can click on to reach the pages.

Throughout the “Study Guide” each study assignment can be opened from the electronic version / pdf file or from the Healthy People 2020 and the Community Toolbox web pages.

You will be asked to read each page and click on and read text from links on those pages. In all there are hundreds of pages of information, resources and tools beyond the original pages you will be asked to read and review.

The test has both multiple choice and short answer questions. Since there are more components to understanding how to mobilize than this hour course can cover you are not required to read every page.

You will have the opportunity to select what you feel is most relevant to you. Be prepared to very briefly and concisely (≤50 words) describe why the component you selected was important to you.

Opening the Study Assignments and Time Estimates

1. Keep this Study Guide opened on your computer to be able to click on the links in the Study Guide.
2. Follow instructions on a printed copy to get to assignments.

Time to complete the course includes two components. 1) Estimated time to read text based on reading speeds of 250 words per minute (wpm) to faster speed at 300 wpm.
